

Ahmed Mohamed Oraby

Software Engineer with 2 years experience

✉ ahmed.oraby.dev@gmail.com ☎ 01205082343 📍 Cairo, Egypt in Ahmed Oraby 🌐 Ahmed Oraby

SKILLS

- php | Laravel | Angular | EcmaScript 6 | OOP | MYSQL | Design Pattern | MVC | API | Html | Css | Bootstrap | JQuery | GIT/Github | angular material | solid principles | basic nodejs

EXPERIENCE

- Full Stack Developer** 2022 – present
Work on independent projects for clients
- Full Stack Developer | golden ratio company** 07/2023 – 01/2024
remotly, saudi Arabia
- Back End Developer | netexperts company** 07/2023 – 12/2023
remotly, saudi Arabia
- Front End Developer | creative cloud it company** 09/2022 – 12/2023
remotly, Saudi Arabia
- Full Stack Developer | Sphinx company** 05/2022 – 10/2022
Giza, Egypt

EDUCATION

- Graduated from Faculty of computers and Artifacial Intelligence** 08/2019 – 08/2023
(Medical Informatics Department) Egypt
GPA : 3.2 / 4

PROJECTS

(1) SAG

As the backend Laravel developer for my graduation project, I played a pivotal role in the development of a comprehensive API that powered both a website and a mobile app. The project, named SAG 'Smart Assistant Glasses' aimed to provide innovative and inclusive solutions for the visually impaired community. The API served as the backbone, facilitating seamless communication between the website, mobile app, and the underlying database.

(2) logistic

I served as an Angular Developer at Creative Cloud IT Company, contributing to a dynamic and innovative logistics project. The project aimed to streamline and enhance logistical operations, encompassing maritime, aerial, and land-based transportation services for both domestic and international purposes. My role involved crafting and implementing Angular solutions to optimize the user interface and overall user experience of the logistics platform.

(3) Movie Website

dynamic project centered around a website dedicated to showcasing the latest trends and popular movies. The project involved integrating with a Movies API to curate and present a diverse selection of films. Leveraging Angular, I designed and implemented a user-friendly interface that allowed users to explore and discover trending movies seamlessly.

(4) HIM

As an Angular developer at Sphinx, I took on a pivotal role in enhancing and modifying the 'HIM' project, which was designed for the Higher Institute of Management. The project's primary objective was to facilitate student registration and fee payments, streamlining administrative processes for the institute.

(5) point-of-sale

I spearheaded the development of a Laravel-based Point of Sale (POS) system, incorporating modern features and leveraging various technologies to create a comprehensive solution. The POS system was designed to streamline business operations and enhance the overall efficiency of sales processes.

(6) golden ratio

As a full-stack developer, I led the development of an internal audit and risk management system. Leveraging Laravel on the backend and Angular on the frontend, the project aimed to streamline internal auditing processes and enhance risk management within the organization. The system provided comprehensive tools for conducting internal reviews, managing risk assessments, and generating insightful reports. My role involved creating a seamless user experience, implementing robust backend functionalities, and ensuring secure data handling. This project not only showcased my proficiency in both Laravel and Angular but also contributed to the efficiency and effectiveness of internal processes for audit and risk management

(7) chat

I spearheaded a project management system focused on task organization, seamlessly integrated with a real-time chat feature. Leveraging cutting-edge technologies, the system provided a dynamic platform for teams to efficiently manage tasks and communicate in real-time. My role involved creating an intuitive interface for task tracking, implementing features for project organization, and ensuring a responsive real-time chat experience. This project not only streamlined task management but also fostered effective communication within teams, contributing to enhanced collaboration and productivity . <https://flyeasy.io>
